

Hybrid- Host/Remote

- Hosts have call delivery servers which can be shared with up to 3 additional PSAP's. The remote PSAP's have reduced licensing costs (approx. 40%)
- Remote PSAPs can serve as backups for each other off same host PSAP
- Hosted PSAP sites can share call routing servers and resources between sites at additional costs
- All PSAPs have gateways, routers, switches and call taking work stations
- Requires dedicated data connectivity (minimum 2.5Mbps)
